Welcoming the U of T community back to campus

The University of Toronto is looking forward to welcoming the community to the campuses and have been working diligently with the U of T community, public health experts and others for a safe return. For more information, please see [How U of T is preparing for a safe return to campus](#) and Facilities & Services, [10 seasonal maintenance activities that F&S does to ensure that the campus is ready for the fall and winter.](#)

Ventilation Information Request (by building)

As mentioned in previous communications, the University has developed and implemented a [Tri-campus HVAC Strategy](#) as part of an overall ventilation approach for both instructional and non-instructional spaces and buildings. As part of the [Strategy](#), where applicable, measures have been taken to increase ventilation (e.g. performing air flushing two hours before occupancy every morning and upgrade filtration) and upgrading ventilation. The upgraded filters, which meet public health and other experts' recommendations, are rated **MERV-13**, up from **MERV-8** previously. Same as before the pandemic, the University continues to maintain our ventilation systems on a regular basis. If additional information on ventilation is required, please contact your JHSC with the request. Please note that such requests may require **weeks** to complete depending on the size and complexity of the ventilation system.
