**Workplace Label**

**Product name:** Bouin solution

Contains: formaldehyde (10%), methanol (5%), acetic acid (5%), picric acid (1%)

**Safe handling precautions:** Toxic in contact with skin, if swallowed or if inhaled. Metal Corrosion. Wear protective gloves/protective clothing/eye protection/face protection. Picric acid is shock and friction sensitive when dry. Care should be taken to ensure that crystals are not allowed to form during use of the solution by wiping the threads of the container and the cap after pouring. Contaminated work clothing should not be allowed out of the workplace.
