

Radiation Protection Service

Application for TLD Radiation Monitoring Service

Application must be authorized by Permit Holder and Business Officer

Note: Only users of more than 1 mCi of strong beta (like: P-32) or gamma emitters (like: I-125) need a TLD. Radiation emitted by H-3, C-14 and S-35 cannot be detected by the TLD. The following information is required for CNSC licensing purposes.

Please complete the form and submit to Radiation Protection Services (Fax 416-971-1361) or e-mail to: hector.rocca@utoronto.ca
